

Junior Computer Vision & Machine Learning Engineer

Location

Gothenburg, Sweden

About Us

Viscando is passionate about bringing the benefits of computer vision and artificial intelligence to make our cities sustainable, safer and attractive. We have developed an intelligent and self-learning sensor solution for understanding road user behavior, their interactions and make predictions for traffic safety improvements. Our customers are from diverse fields such as developers for autonomous vehicles, Smart cities etc. From Time to time, we also help companies to innovate new sensor technologies and computer vision-oriented solutions. We are keen on offering our employees a varied and stimulating work assignment with plenty of room for personal and technical development.

We are in the process of significant growth through internationalization and new product development. We are looking for new friends to join us and grow together with us. Applications will be handled continuously.

About you

Foremost, you are passionate about Computer Vision and Machine Learning as technology, but also are looking to use the technology for a positive impact in society.

Must-have experiences

- M.Sc. within fields related to computer vision & machine learning
- Proven skills in mathematics, and preferably also in statistics
- Proven skills in programming, at least in python. C/C++ skills are preferred.
- Working experience and/or student projects where computer vision or machine learning has been a significant part of the assignment

Personal traits we like

- Curious at heart, especially regarding new methodologies within computer vision, deep learning etc.
- Sees the positive impact of working in teams – enhancing yourself as well as support others to develop
- Value differences in co-workers – different and constructive viewpoints are important for innovation and improvement
- You like technical challenges but would also like to understand the customer perspective

We are a privately held company, where the founders are involved in the day-to-day work together with our talented staff. We value staff influence and want to promote the personal development goals on an individual basis. You can choose to become a specialist or start taking management and leadership roles. International contacts are a natural part for most of our co-workers.
